Link	<pre>[title](https://www.example.com)</pre>
Image	<pre>![alt text](image.jpg)</pre>
Footnotes	
1	There are a number of ways to mark headings. Most common is shown
2	Or use <code>_</code> (underscore(s)), in place of the asterisk(s), whichever comes naturally
3	Or start your list items with <code>-</code> (hyphens) or <code>+</code> (plus signs), again, whichever comes naturally
4	Or use three <code>---</code> (hyphens)
